TIME4ADVICE

Full Stack Developer
Be part of something amazing.

Our mission, your task.

Time4Advice is on a mission to disrupt the financial advice technology landscape. For far too long technology providers have failed to deliver the panacea of benefits promised.

We're out to change that. It's why we've teamed up with Microsoft to create CURO, the most modern financial advice solution in the market. Spanning a firm's entire business, CURO is a digital transformation platform that delivers multi-channel client experiences, the ability to service more clients, centralised data, reduced risk and significant operational efficiencies.

Built on Microsoft's Dynamics 365, CURO is underpinned by $4bn annual investment by Microsoft in the underlying technology, AI and machine learning. This means Time4Advice's clients can be assured that CURO will remain at the forefront of modern advice technology and enable them to take full advantage of future AI and machine learning opportunities.

Your task is to help us fully utilise the power of Microsoft technologies and develop CURO into the UK's leading technology solution for financial advice professionals.

Developing your skills and working on the latest Microsoft technologies.

You will develop your skills and experience by working with some of Microsoft's latest and best technologies including Dynamics CRM, Azure app service, and the technologies to support our migration to the Microsoft Power Platform. Our roadmap features the adoption of PowerApps, Power Automate, AI builder and Azure services. Time4Advice has been chosen by Microsoft to implement and showcase these latest and exciting technologies into the financial services and financial planning sector in the UK.

Unique culture, established company, financial backing.

Based in Norwich, we were formed in 2010 and have established an outstanding reputation in our sector with over 4,000 users of our solution. In January 2021, we were acquired by IntegraFin, a FTSE250 listed company that operates Transact the multi-award-winning investment platform. This means we are now part of a 500 strong team and have the financial backing to take our solution to the next level and fulfil our mission.

About the role.
